Betreff: Bayerisch - Chamonix

Dear Ralf,

we have climbed your route yesterday on Geierkopf. This was definitely the best winter route that i have climbed in Bayern.

Thank you very much for your work, that enabled us to have a great adventure on such a beautiful mountain!

We had super dry conditions, no ice on 1st pitch (~m6+?). The bolts unscrew with time, we have screwed the loose ones, but unfortunately the first one on the 2nd M7 pitch is now missing (we aided through this part on the screw).

I could not also find the bolt on 3 pitch (M4 stelle) and had to solo this part, which was definitely the most exciting moment of the day :) But maybe i just climbed the wrong section?

All in all beautiful day with great conditions on amazing mountain. Thank you very much!

all the best!

Maciej
